

## 6<sup>th</sup> WORKSHOP

4 November 2020

Faculty of Medicine  
Bone Lab  
Virtually by ZOOM

## TOPIC: Animal models of bone metastases

The main goal of our workshop is to increase the knowledge and understanding of young µBONE researchers about the preclinical models for bone metastasis research. Therefore, we offer the opportunity to meet and interact with prestigious speakers in order to shape and foster collaborations within the µBONE consortium.

### Wednesday, November 4<sup>th</sup>:

Activity	Time	Tutor
Models of prostate cancer bone metastasis	09:00 - 09:30	Anna Dubrovská
Models of breast cancer bone metastasis	09:30 - 10:00	Hanna Taipaleenmäki
Imaging workup of bone metastasis	10:00 - 10:30	Martina Rauner
Questions and answers	10:30 - 11:15	Martina Rauner, Andy Göbel, Ben Wielockx, Hanna Taipaleenmäki
