

Gender equality measures

Support during parental leave AND Support during COVID-19 situation

Family is our strongest network. That is why the DFG strengthens young families by financing a technician to help parents to continue lab work.

Furthermore, the consortium would like to support PIs, postdocs or doctoral students who have to stay out of the lab and cannot work properly as they have to take care or educate their children when school or kindergarten is closed due to COVID-19.

The funding will be allocated to projects within the entire μBone consortium, each 2 - 4 months depending on hrs/week.

1. Please **consider institution's internal regulation** first! Get in contact with your "Familienbüro" and "Personalabteilung" (HR) on-site and finally, get in contact with the coordinator to check for how long a financing might be possible.
2. A forwarding agreement ("Weiterleitungsvertrag") between your institution and TU Dresden will be drafted.
3. We need a copy of your notification of approval ("Bewilligungsbescheid").
