

μBone – Start Up Funding

- Goal:** To support 1-2 young scientists to sharpen their scientific profile in bone metastasis research and allowing them to finish off final experiments for theses and papers
- Eligibility:**
- Applicants must be working towards their MSc/PhD/MD or must be within 5 years of completing their PhD or MD degree
 - Applicants must be affiliated with one of the current μBone PI's (see www.microbone.de)
 - Aim of the research grant must be in line with the μBone research aims (i.e. exploring novel mechanisms of breast and prostate cancer cell colonization into the bone, defining interactions of circulating and disseminated tumor cells with the bone microenvironment or developing and validating novel tools for bone metastases research)
- Funding:** 5.000 €, max. 3 months
- Personnel costs
 - Consumables and publication costs
 - Developing collaborations and participating in conferences
- Requested documents:** Short research proposal (max. 1 page)
Financial plan
CV & Publication list
- Evaluation procedure:** Deadline: 31th January 2022
Start of funding: 1st March/April 2022
Evaluation will be conducted by the μBone Steering Committee
