

μBone – Lab rotation

Goal: enables scientists to visit the labs of collaborating partners and to learn novel techniques that they bring back to their home lab. It also serves to standardize animal and tumor models systems within the consortium.

Funding: will cover travel and accommodation according to the Saxonian Travel Cost Law. A budget of 1,000 € per rotation is estimated and the upper limit per institution is 2.000€!

Duration: 1 – 4 weeks

We need:

- Name of student, project, institution, PI
- Institution to be visited, planned date, estimated costs

→ After our confirmation, plan your journey according to your institution rules and collect all original receipts.

→ After your lab rotation get in contact to Sylvia (sylvia.thiele@ukdd.de)
